50% of \$155.5K/yr	
TOTAL LABOR	
34.4%	\$11,717
over by 9.4pp of 25%	

Pre-Donut-Friend view. Identical to the Post-DF baseline (Tab 1b), plus **overnight donut prep**: 16 shifts/week (2×/day, 3× Thu/Fri/Sat), 10:00pm–6:30am, \$20/hr, 8h each = **\$1,920/week** added BOH labor. Donut prep is listed per day and included in the labor totals above, but runs outside the display window so it is not drawn on the bar chart. Switch to Tab 1b to see the post-transition model with donuts supplied by Donut Friend (this labor removed).

50% of \$155.5K/yr · 50% to WCC

TOTAL LABOR

28.7% \$9,797

over by 3.7pp of 25%

Note: Manager salaries are split 50 / 50 between Cafe Knotted AD and WCC. Only the 50% allocated to this location (\$77.75K/yr of \$155.5K/yr total) is counted in the labor figures above. The other 50% sits on WCC's books.

Data note: Baseline is now the most recent 4 weeks, weighted toward the most recent week (weights 4/3/2/1, so last week = 40% of each day-of-week baseline). The post-Nate.Eatz days (Jun 18-21) are the most recent week and so carry the heaviest weight, which pulls the baseline up and lets the residual lift compress as actuals land. Memorial Day (May 25) is included. The current week (Tab 2) and forward projection (Tab 3) layer the residual recency lift on top — see their driver factors for details.

Sun 8/9	+0.0%	\$6,183	\$6,337	+2%

- Baseline model (viral lift subsided). The Nate.Eatz social spike has faded, so projections are now the plain per-day-of-week baseline: the most recent 8 occurrences of each weekday, weighted toward the last 2 weeks (weight 3 each vs 1 for the oldest four). No separate viral lift is applied. As new actuals land they fold into this window, so the baseline tracks the current normal level on its own.
- LAUSD on summer break — modest weekday shape shift Mon-Fri: -3% AM (school-run thinner), +3% midday (leisure lift).
- Weather (checked Jul 14): typical warm, dry LA July through the forward week — highs low-to-high 80s this week (Wed ~90° the warmest), upper 80s and dry next week, ~0 chance of rain throughout. Nothing anomalous (no rain event, no >95° heat wave, no unusual cool spell), and the baseline is already built from June-July data under these same conditions, so no weather multiplier is applied. A rain day or an extreme-heat day would be added as a day adjustment if it appeared.

- Baseline model (viral lift subsided). Same 8-week weighted day-of-week baseline (last 2 weeks heaviest), no viral lift and no weekend shaping — the recent-weighted baseline carries the day-of-week levels directly. This is the normal, pre-viral projection method.
- LAUSD on summer break — modest weekday shape shift Mon-Fri: -3% AM (school-run thinner), +3% midday (leisure lift).
- Weather (checked Jul 14): typical warm, dry LA July through the forward week — highs low-to-high 80s this week (Wed ~90° the warmest), upper 80s and dry next week, ~0 chance of rain throughout. Nothing anomalous (no rain event, no >95° heat wave, no unusual cool spell), and the baseline is already built from June-July data under these same conditions, so no weather multiplier is applied. A rain day or an extreme-heat day would be added as a day adjustment if it appeared.

POTENTIAL ISSUES & SUGGESTED FIXES

- No new coverage gaps from projection — existing schedule should hold.
